Did you know?

Harmful Chemicals Could Be Lurking in Your Home

- The average household contains more than 60 harmful chemicals.
- These chemicals can negatively impact our health and the health of our families.

Our Bodies Bear the Burden

- Many of the toxins that we breathe in and put on our bodies can build up, causing what is known as Body Burden.
- The heavier our Body Burden, the more it can negatively affect our health.

There’s a better way.
Norwex was founded more than 25 years ago in Norway, known for its forests, fjords and fresh air.

Since then, our goal has been to help people everywhere create Safe Havens. How do we do it? By reducing harmful chemicals and waste that challenge the health of our families and the health of our environment.

Create Your Own Safe Haven!

Effective
- Norwex Microfiber is proven to remove up to 99% of bacteria from surfaces—using only water.*
- Our innovative plant- and enzyme-based products work to tackle tough jobs while leaving little footprint.
- We own our Research and Development and manufacturing facilities, so we oversee every step of the process—you can be confident that our products are safe and they work.

No harmful chemicals
- Norwex Microfiber and water alone cleans better than and significantly reduces toxic cleaning chemicals that can impact your family’s health.
- Typical cleaning products are among the most toxic items in the home. That’s why each of our ingredients undergoes an extensive safety and toxicological assessment.
- We maximize the use of plant-based ingredients and enzyme-based technology to provide better, safer alternatives to traditional, chemical-based cleaners.

Sustainable
- Many of our products are designed to replace single-use plastic and paper towels.
- Some of our most popular microfiber products now contain up to 70% recycled materials.
- Our Microfiber Recycling Program converts discarded microfiber into clean, renewable energy.
- Our product packaging incorporates OceanBound Plastic, which helps reduce the amount of plastic entering the world’s oceans.

*When following proper care and use instructions.
Amazing clean with only H₂O—no harmful chemicals required.

The Norwex Microfiber Advantage
Extra-absorbent and ultra-durable.
At just 1/200th the thickness of a human hair, Norwex Microfiber is a superior blend of extra-fine, super-dense, nylon fibers—infinitely better than anything else for picking up dirt and debris!

Removes up to 99% of bacteria from a surface using water only.*

Self-purifies within 24 hours. When wet, our BacLock™ antibacterial agent (micro silver) embedded in the cloth self-cleanses it, drastically reducing mold, fungi and bacterial odor so the cloth is ready to use again and again.

Saves time and money. With Norwex Microfiber, you can save up to $600 a year on cleaning supplies—and cut your cleaning time in half!

Easy to care for. BacLock self-purifies the cloth, so you launder less often! Between launderings, simply rinse thoroughly and hang to dry.

See complete Microfiber Care and Use instructions on page 47.

How Norwex Microfiber Works

Traditional cotton cloth pushes around particles, spreading dirt, grime and moisture into the surface crevices, leaving it unclean.

Norwex Microfiber lifts and collects even the smallest particles of dirt, grease and moisture.

Use It Dry to Dust—Norwex Microfiber’s electrostatic charge picks up and holds everything.

Use It Wet to Clean—When wet, Norwex Microfiber loosens and lifts the most stubborn dirt and debris.

Norwex Microfiber self-purifies—When wet, our BacLock antibacterial agent (micro silver) embedded in the cloth goes to work with self-purification properties.

See pages 54 – 55 to learn more about how Norwex Microfiber can clean every surface in your home!

Some surfaces and finishes can be easily damaged. Please always test Norwex Microfiber on an inconspicuous spot first. Do not use microfiber (except Norwex Optic Scarf and Tech Cleaning Cloth) on anti-glare surfaces.

**Typical spray air fresheners rely on chemical-laden formulas to mask odors. These can irritate nasal passages and may trigger asthma. Many also contain phthalates and aerosol propellants.**

- Our Odour Eliminator is powered by enzymes, which act as natural biological catalysts that speed up the odor-reducing process.
- Norwex products are free from phthalates, which are endocrine-disrupting chemicals found in many air-freshening products.
- Norwex products are free from aerosol propellants, which contribute to indoor air pollution and harm the ozone.

HOW TO CARE FOR YOUR MICROFIBER:
• Do not use bleach, fabric softeners or dryer sheets when laundering microfiber; they coat the fibers and reduce their ability to clean effectively.
• Launder microfiber cloths separately or with other lint-free laundry. Dry completely.
• Rinse slightly dirty microfiber cloths under warm, running water and hang to dry or drop into the dryer.
• For best results, use a laundry detergent that’s free from fillers, like a Norwex laundry detergent.
• For an even deeper clean, use Microfiber Cleaner Laundry Booster.

All Norwex Microfiber products carry a two-year warranty.
